

SCOPE: This generic warning label is intended for dry friction materials (generally brakes and manual transmission clutch parts) that have not yet been assigned a FIR number (Ford Internal Reference Number a.k.a. toxicology number). The master label artwork can be viewed by accessing the FCSD Packaging Engineering web site at <http://web.pkginfo.ford.com>.

Any questions regarding the labeling of dry friction materials should be directed to the FCSD Aftermarket Engineering and Remanufacturing Operations, Product Compliance Activity, via <http://web.pkginfo.ford.com/chemregulations/index.htm>

SIZE: 4-1/2" x 3-3/8"

MATERIAL: White 47#-52# coated, one side to accept thermal transfer printing

LABEL PLACEMENT: Refer to the illustrations below to properly position the label on the carton.

9-4-09 (OVB) Revised Toxicology Label.
